

EverGuard® TPO **GAF** Scupper

Description:

Increase efficiency when addressing this roof drainage feature with factory-built EverGuard® Scuppers. These single-ply roofing system preformed accessories provide roofing contractors with an effective, easy-to-install detail. GAF manufactures these and other accessories from its proven, durable EverGuard® TPO single-ply reinforced membrane. GAF TPO accessories can help you reduce installation costs, risk of leaks, and callbacks, while helping you create a uniform look.

Application:

Preformed accessories may be installed on mechanically attached, fully adhered, or self-adhered EverGuard® and EverGuard® Extreme TPO roofing systems, using conventional application and specifications manual for detailed instructions.

Product Information:

EverGuard® TPO Scuppers are constructed from metal coated with unreinforced 55-mil TPO membrane. Two standard sizes are available and you can contact your local GAF representative for custom sizes. The design eliminates the need for flashing to waterproof the wall opening.
