

The sealant you'll always want on hand

RepairPro Sealant is a solvent-based, synthetic, self-leveling, elastomeric product. It is flexible, durable, and can be used on a variety of substrates. Available in white and black.

Advantages:

- Professional Flashing Grade.
- Can be used with or without fabric. No mixing.
- No primer needed over most substrates.¹
- UV Stable — does not require a top coat.

¹ Not for use over silicone substrates. See gaf.com for more information.

² Standing water should be removed. Metal surfaces must be dry. See product packaging for more details.

Emergency Repairs:

RepairPro can be applied to most damp surfaces to help stop leaks immediately.²

RepairPro forms a flexible, durable seal and is easily applied in one step. GAF Premium Fabric may be used for extra reinforcement on penetrations, flashings, and seams.

Maintenance Applications:

Multi-purpose sealant in convenient packaging makes RepairPro an ideal go-to product for roofers and maintenance/service teams.
