4' x 8' Tapered Q Panels

Increase efficiency and installation time by decreasing number of cuts when using a 4' x 8' rather than a 4' x 4' EnergyGuard™ Tapered Q panel for field-fabricated crickets. Made out of GRF or CGF facers in 20 or 25 psi. Available in all GAF Polyiso Plants, minimum-quantity run orders apply.

Tapered Double Packs

Contains two 4' x 4' bundles to help save time staging, unloading, and on cranes. Available in tapered, fill, and cover boards. For tapered design projects only.

GAF Steely Drain™

Features a laser-etched QR Code that allows contractors to identify the composition of the roof assembly instead of doing a core cut. Also allows contractors to keep track of roof maintenance. Promote long-term maintenance efficiency by incorporating GAF Steely Drain™ into your next Tapered Design System. Request a quote from your Tapered Designer.

We protect what matters most™
