CAF Cold Storage TPO & PVC Roofing System Solutions

Notes:

- 1. Use detail in conjunction with the standard flashing and termination details for the approved roof system.
- 2. A vapor retarder may be used at the deck level if there are concerns with potential moisture issues due to certain construction processes or other sources during building use.
- 3. Refer to GAF SA Primer installation instructions for general guidelines.
- 4. Maintain separation between vapor retarder and membrane / adhesive to avoid potential incompatibility issues.
- 5. For steel roof decks: Fill steel deck flutes with closed cell spray foam insulation prior to the installation of above deck insulation a minimum of 12" [305 mm] from face of wall on each side.
- 6. Wall to roof deck interface must be fully air sealed.
